

Kaif Hasan

Software Engineer | Full Stack Developer (React.js, Next.js, Node.js, React Native)

Kolkata, India | +91 8637011969 | kaifhasan222@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience building scalable web and mobile applications using React.js, Next.js, Node.js, Express.js, React Native, TypeScript, MongoDB, and PostgreSQL. Experienced in reusable UI systems, admin dashboards, REST API integration, authentication, full-stack project delivery, performance optimization, and production-ready deployments. Hands-on with AI-assisted development tools and modern IDE workflows for faster debugging, code generation, and product iteration. Immediate Joiner.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, TypeScript, JavaScript, React Native, Ionic React, HTML5, CSS3, Tailwind CSS, Material UI
Backend:	Node.js, Express.js, REST APIs, JWT Authentication, OTP flows, GraphQL, API Integration
Database:	MongoDB, PostgreSQL, MySQL, Firebase, Supabase
Security & Testing:	Helmet, Express Rate Limit, bcrypt, Authentication & Authorization, Vitest, React Testing Library
Tools / AI:	Git, GitHub, Postman, VS Code, Vercel, Render, Cursor, Codex, Claude, ChatGPT, Gemini, DeepSeek, Qwen, Google Antigravity

PROFESSIONAL EXPERIENCE

WebSkitters Technology Solutions Pvt. Ltd. | Software Engineer (React.js & Node.js) | Apr 2026 - 30 Jun 2026

- Worked on Mathora, an education and assignment management platform for teachers and students.
- Developed responsive admin panel and user-facing screens using React.js and Next.js.
- Built reusable UI components, assignment workflows, dashboards, and role-based interface flows.
- Integrated REST APIs, handled frontend data states, and collaborated on Node.js/API-driven delivery.
- Supported bug fixing, feature enhancements, testing, performance improvements, and production handoff.

Tech Stack: React.js, Next.js, JavaScript, TypeScript, Node.js, REST APIs, Git

SISE Technology Pvt Ltd | React JS Developer | Dec 2025 - Mar 2026

- Built the official SISE website with a responsive frontend using Next.js and TypeScript.
- Worked on PlayaSport and delivered web/mobile experiences with React and React Native.
- Created reusable UI components, integrated REST APIs, and maintained consistent UX across products.
- Focused on scalable frontend architecture, performance, production-ready delivery, and smooth user flows.

Tech Stack: React.js, Next.js, TypeScript, React Native, REST APIs, Tailwind CSS

Simpsoft Solutions Pvt Ltd | Frontend Developer / Software Engineer | Oct 2022 - Jul 2025

- Built analytics, CRM, admin dashboard, and mobile/web interfaces for SimpROI, SimpTable/Ssuites, and AgScout.
- Delivered reusable React/Ionic components, API integrations, responsive layouts, and product enhancements.
- Worked with GraphQL/REST APIs, feature debugging, code maintenance, testing support, and iterative releases.
- Contributed to client-facing agriculture, admin, and business workflow applications with strong UI ownership.

Tech Stack: React.js, Ionic, TypeScript, Material UI, GraphQL, REST APIs, Vitest

CORE STRENGTHS

- Frontend ownership: reusable React/Next.js components, admin dashboards, responsive UI, performance-focused interfaces, and API-driven screens.
- Full-stack growth: hands-on Node.js/Express.js practice through personal projects, authentication, REST APIs, MongoDB, and deployment workflows.
- Mobile capability: React Native and Ionic React experience for cross-platform product interfaces and mobile-first user workflows.
- AI-assisted engineering: uses modern AI models and IDEs to speed up debugging, refactoring, UI iteration, documentation, and development planning.

FEATURED PROJECTS

Kaif Resume Builder

AI-powered resume analysis and generation platform for creating ATS-friendly resumes from PDF/DOCX uploads.

- Built live editor flows, template rebuilding, resume parsing, and ATS-style scoring experience.
- Focused on clean UI, upload workflows, AI integration, and production-ready responsive pages.

Tech Stack: React.js, Next.js, TypeScript, Tailwind CSS, AI Integration

Full Stack Todo Management Application

Full-stack productivity app built from scratch to strengthen end-to-end React, Next.js, Node.js, and Express.js skills.

- Implemented authentication, protected routes, CRUD operations, task tracking, and soft delete functionality.
- Added backend security with Helmet, Express Rate Limit, bcrypt password hashing, validation, and REST APIs.

Tech Stack: Next.js, React.js, Node.js, Express.js, MongoDB, JWT, Helmet, bcrypt

Trading Kaif - AI Trading Assistant

Real-time trading dashboard concept with AI-assisted chart analysis and modern product UI.

- Designed dashboard-style frontend flows for trading analysis, chart context, and user-friendly decision support.
- Applied AI tooling knowledge to improve feature planning, debugging, and interface iteration speed.

Tech Stack: React.js, Next.js, TypeScript, AI Integration, Dashboard UI

Google Docs Clone

Full-stack collaborative document editor with live syncing, rich text editing, and persistent storage.

- Implemented real-time multi-user editing using Socket.IO and document state synchronization.
- Built document creation, editing, save flows, and a Google Docs-style rich text experience.

Tech Stack: React.js, Node.js, Socket.IO, Quill, MongoDB

AgScout - Vineyard Scouting Platform

Mobile and web vineyard scouting platform delivered as a Simpsoft client project for agriculture workflows.

- Worked on field notes, image capture, offline-first mobile flows, role-based dashboards, and API-driven screens.
- Supported production UI improvements, responsive behavior, and GraphQL data integration.

Tech Stack: Ionic, React.js, TypeScript, GraphQL, Vitest

E-commerce Buy & Sell Platform

Marketplace application for buying and selling products with full-stack product listing workflows.

- Built product browsing, listing, and marketplace-style UI flows with reusable components.
- Worked on frontend/backend integration patterns and user-focused responsive layouts.

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs

SISE / PlayaSport / SimpTable-Ssuites

Production and client projects across corporate websites, sports discovery, CRM, and admin dashboards.

- Delivered responsive corporate sections, booking/discovery flows, admin dashboards, and CRM interfaces.
- Maintained reusable components and optimized frontend workflows across multiple business products.

Tech Stack: Next.js, React Native, React.js, TypeScript, REST APIs, Material UI

Airbnb Clone

Full-stack booking-style application for accommodation discovery and reservation workflows.

- Implemented listing pages, booking-style UI, reusable components, and user-friendly responsive screens.
- Practiced full-stack architecture patterns, database-driven flows, and product-style feature structuring.

Tech Stack: React.js, Next.js, Node.js, MongoDB, REST APIs

AI-ASSISTED DEVELOPMENT WORKFLOW

- Uses AI models from US and China ecosystems including ChatGPT, Claude, Gemini, DeepSeek, Qwen, Grok and Codex-style assistants for coding support, debugging, documentation, and research.
- Comfortable with modern AI IDE workflows such as Cursor, Claude-assisted coding, Codex, Google Antigravity, and AI-assisted refactoring for faster product iteration.
- Applies AI tools practically for frontend UI generation, backend API planning, bug analysis, code explanation, resume/portfolio improvements, and deployment troubleshooting.

EDUCATION & ADDITIONAL HIGHLIGHTS

B.Tech in Computer Science & Engineering (CSE) - Swami Vivekananda University, 2023

- Comfortable across web, mobile, admin dashboards, real-time collaboration, CRM systems, and full-stack product workflows.
- Uses AI-assisted development tools professionally for code explanation, debugging, refactoring, UI iteration, and documentation support.
- Strong focus on clean reusable components, maintainable architecture, fast delivery, API-driven development, and production quality.

PROJECT IMPACT & RESPONSIBILITIES

- EdTech / Mathora: worked on admin and teacher-student learning flows including assignment-related screens, dashboards, reusable UI components, and API-driven page states.
- AI Web Apps: built resume analysis and builder-style workflows with upload handling, live editing, template rebuilding, ATS-focused presentation, and AI-assisted UI logic.
- Full-stack Practice: developed REST APIs, authentication, protected routes, CRUD operations, soft delete, MongoDB data handling, and deployment workflows in personal projects.
- Mobile / Cross-platform: contributed to React Native and Ionic React product flows for web and mobile users, including responsive screens and mobile-first interactions.
- Admin Dashboards: delivered dashboard interfaces, CRM-style pages, filters, data-heavy UI, reusable components, and maintainable frontend architecture across client products.
- API Integration: comfortable connecting UI flows with REST and GraphQL APIs, handling loading/error states, form validation, role-based UI behavior, and data synchronization.
- Production Delivery: focuses on clean code, bug fixing, performance optimization, testing support, Git workflows, deployment readiness, and fast handoff with product/design teams.
- Learning & Growth: continuously improves full-stack knowledge with Node.js, Express.js, database design, application security, AI coding tools, and real-world project building.

PORTFOLIO PROJECT ARCHIVE

Mathora	Education platform - teacher/student modules, assignment workflows, admin UI, React/Next.js frontend and API integration.
Kaif Resume Builder	AI web app - ATS scoring, resume upload, live editor, PDF/DOCX-oriented resume rebuilding, template UI.
Full Stack Todo App	Personal full-stack build - authentication, CRUD, soft delete, security middleware, MongoDB, frontend/backend deployment.
Trading Kaif	AI trading dashboard concept - chart-focused UI, decision-support flows, real-time dashboard style interface.
Google Docs Clone	Real-time collaboration - Socket.IO syncing, rich text editing, document persistence, collaborative writing flow.
E-commerce Buy & Sell	Marketplace - product listing, browsing, selling workflows, full-stack integration and responsive product UI.
AgScout	Client product - vineyard scouting, mobile/web flows, image/field notes, role dashboards, GraphQL-driven screens.
SISE / PlayaSport	Sports and entertainment products - corporate website, academy discovery, booking/account flows, web + mobile UI.
SimpTable / Ssuites	Enterprise admin dashboard - CRM-style screens, data-heavy UI, filters, reusable components, and REST API integration.

ATS ROLE FIT

Target Roles	React Developer, Next.js Developer, Full Stack Developer, MERN Stack Developer, React Native Developer, Frontend Engineer
Frontend Keywords	Component architecture, responsive UI, admin dashboard, role-based UI, forms, validation, performance optimization, API integration
Backend Keywords	Node.js, Express.js, REST API, JWT authentication, MongoDB, PostgreSQL, password hashing, rate limiting, secure API workflows
Delivery Keywords	Production-ready UI, bug fixing, Git collaboration, deployment support, documentation, testing support, reusable components, maintainable code
AI Keywords	AI-assisted development, prompt engineering for coding, code review support, debugging assistance, documentation generation, rapid prototyping
Mobile Keywords	React Native, Ionic React, cross-platform screens, mobile-first design, account flows, discovery/booking UI, responsive interaction patterns
Project Domains	Education technology, AI resume tools, trading dashboards, e-commerce marketplace, sports platforms, agriculture scouting, CRM/admin systems
Workflow Tools	GitHub, Postman, Vercel, Render, VS Code, Cursor, Figma basics, API testing, environment configuration, deployment troubleshooting
Availability	Immediate Joiner Open for React.js, Next.js, Node.js, React Native, Frontend, MERN, and Full Stack opportunities
